Jumper x LiFi

STATUS

Open to roles
Arc Architects

ABOUT

I'm a builder, researcher, and content creator navigating the edges of Web3. I build tools that solve real on-chain problems, research protocols from the inside as a regular DeFi user, and create content that makes complex ecosystems accessible to everyone — while contributing on-chain across the ecosystems I believe in.

PRODUCTS BUILT

ArcSense

Arc Testnet · Arc Hackathon 2026 · LIVE

Real-time intelligence infrastructure for Arc. Scans every live block, detects failing transactions, exposes intelligence via a pay-per-query API. Features an autonomous agent that monitors Arc every 5 min and pays for intelligence from its own Circle wallet.

arcsense-lite.vercel.app

BaseLens

Base Network · LIVE

AI-powered Base upgrade intelligence. Transforms complex Base GitHub announcements into structured insights — what changed, why, user & developer impact. Public feed, no login needed.

baselens-psi.vercel.app

CONTRIBUTIONS

Arc Network

Ecosystem Showcase · Forum · 2026

Submitted ArcSense to Arc House Ecosystem Showcase. Active Architects Program contributor.
community.arc.io

Dango.exchange

Weekly Content Series · Active

Weekly series on Dango protocol updates, mechanics, and ecosystem developments on X & Paragraph.

Jumper x LiFi

Weekly Content Series · Active

Weekly series covering cross-chain bridging mechanics, updates, and multi-chain UX.

Yala Finance

Ecosystem Contributor · 2024 - 2025

Heavy contributor to Yala Finance — Bitcoin liquidity layer for DeFi & RWA yield. Participated from Testnet V1, V2, V3 through Mainnet.

Plume Network

Research Contributor · 2024 - 2026

Research and community contributions covering real-world asset tokenization on Plume.

Caldera

On-chain Contributor · 2023 - 2025

Early participant across all Caldera campaigns on Galxe, Layer3, and Superboard. Minted exclusive NFTs: Calderascope, Soulbound Crusade, METALAYER, and 'I Was Early'.
